Individual Reflection

Week 1

DAT256
Anders Magnusson

What do I want to learn or understand better?

I want to learn how to be effective as a member in a team employing an agile framework such as scrum. I want to understand better how each role in such a team works and how the different roles work together.

How can I help someone else, or the entire team, to learn something new?

I can share my knowledge about how to use git effectively and consistently as a team, for example by explaining and sharing the tutorials that helped me the most.

What is my contribution towards the team's use of Scrum?

I have actively participated in team exercises and discussions about the scrum process. I also spent time reading about the framework and how to use it effectively as a member of the team.

What is my contribution towards the team's deliveries?

So far my contribution has mainly been being active in the discussions about the product idea and setting up a server for our team's online voice communication.
